

**Safe and
effective**

A self exploration & observations of the COVID 19 anxieties surrounding the lockdowns & mandated Immunisation program in New Zealand from 2021 to 2022.

During the Covid 19 vaccine rollout the New Zealand Government developed the largest propaganda campaign in the countries history partnering with Big Pharma, Big Tech & mainstream media to push out the universal narrative of 'safe & effective.'

To increase the uptake of the experimental gene therapy medicine, the New Zealand Government passed a law that allowed children of 12 years to get vaccinated regardless of their parents wishes.

There were often sites setup offering junk food to entice children to take the experimental vaccine. Many kids took the medicine multiple times using fake names in exchange for the Governments bribes.

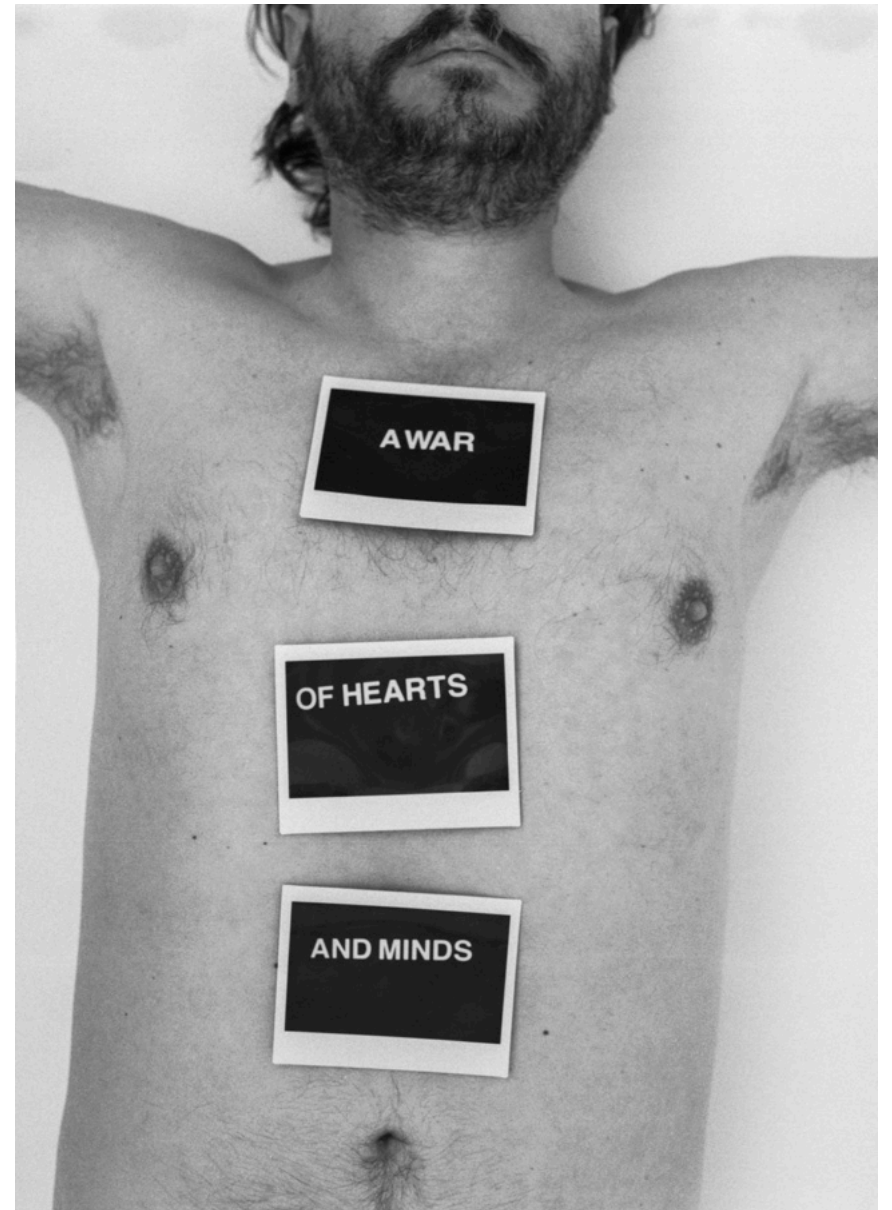

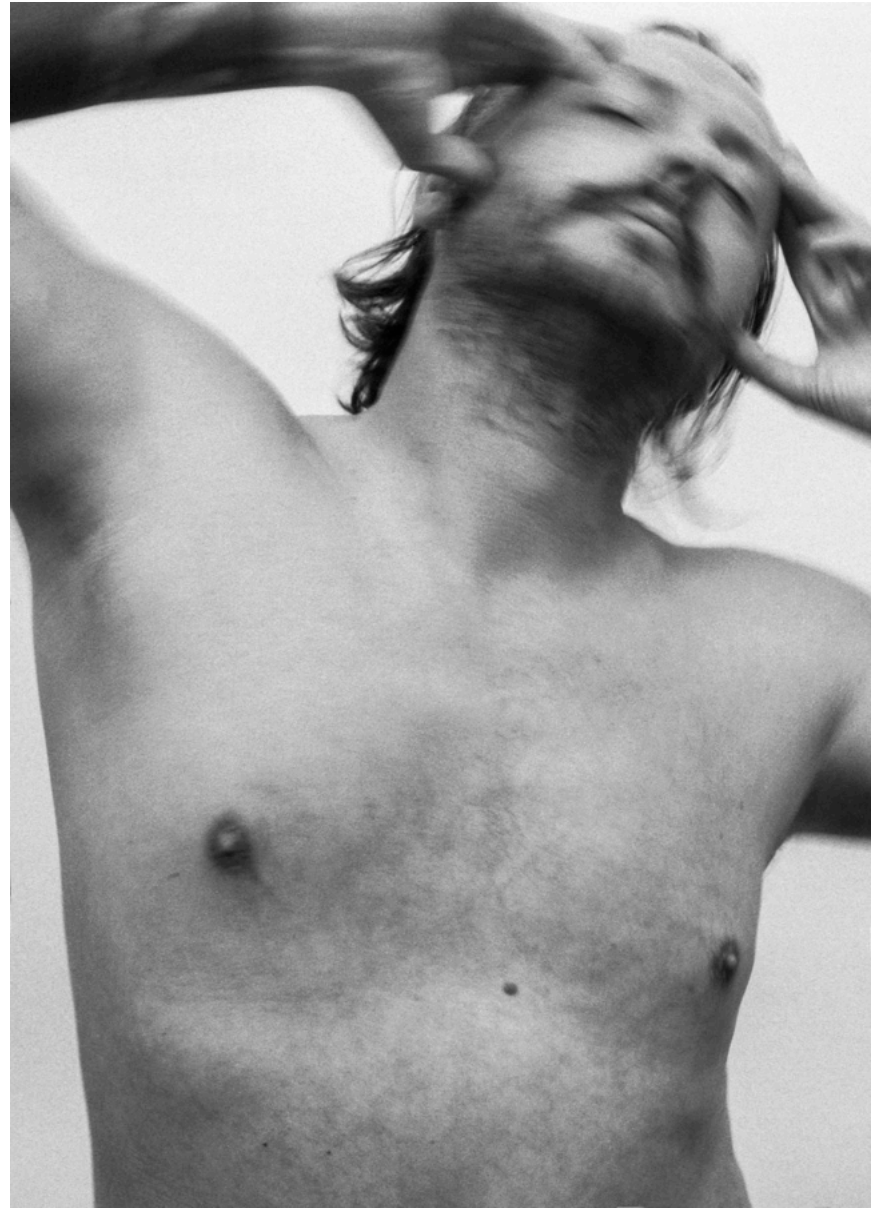

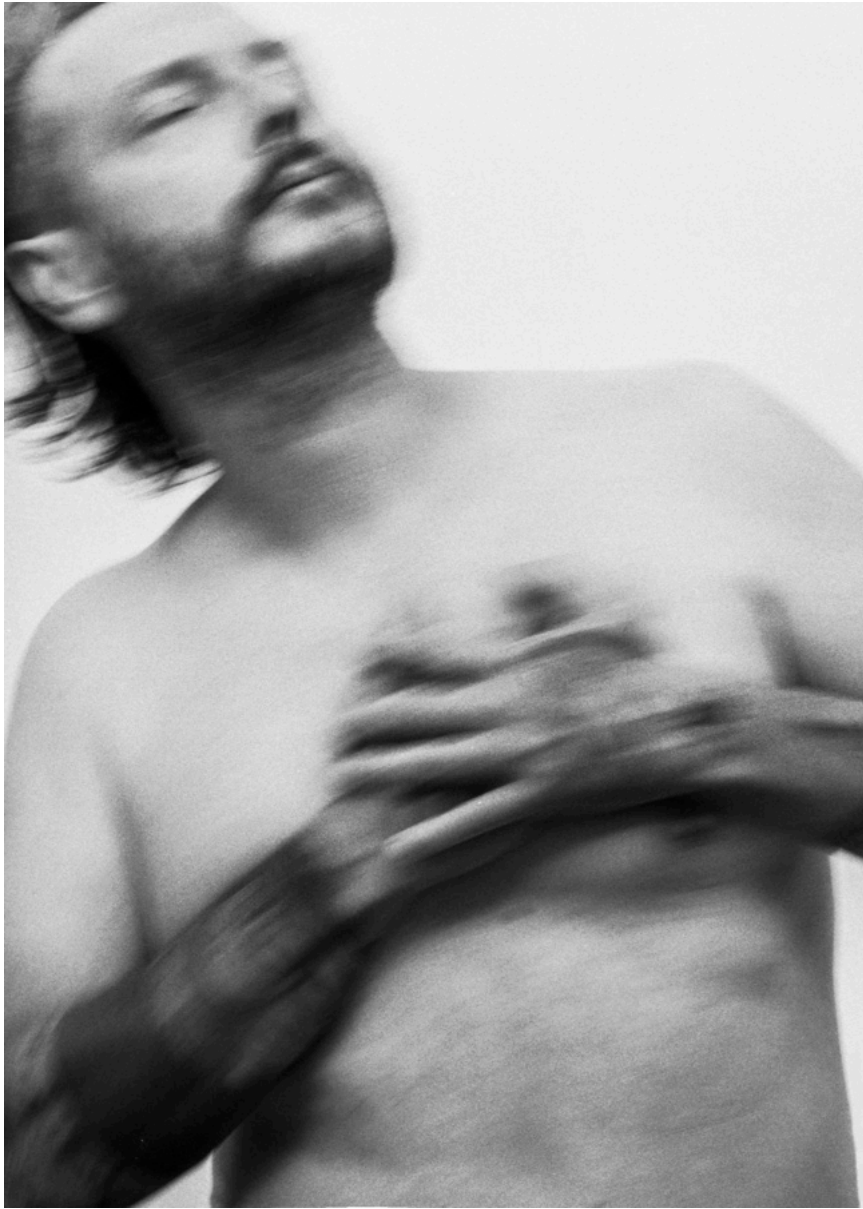

Sudden adult death syndrome (SADS) & record excess death is now common place globally & not attributed to the experimental mRNA technology.

Is the risk of participating in a world first gene therapy medicine program greater than catching the virus itself?

This zine was first published in May 2023. The New Zealand Government still pushes the experimental gene therapy with risks that include death, turbo cancers, neurological disorders & disability.

It's now known that the young are particularly susceptible to the long list of side effects from the experimental Covid 19 gene therapy technology.
